## Fiery surprise for Oak!

Last week, when Miss Wilson opened the cupboard she was shocked to see a fierce dragon sitting in a nest in her cupboard. I was super excited to see this mysterious dragon but I was petrified at the same time.

Oak was in the middle of an English lesson when a dragon that was blood-coloured with sharp yellow horns was perching in the nest in Miss Wilsons cupboard. It was spotted by my teacher (Miss Wilson). I started to get excited. I felt like the happiest person on the world.

This is an incredible discovery because this had never happened before. A wave of excitement was going through me, but I was also petrified.

Mrs Myers will now be looking after this dragon that has been found. There are two more eggs in our class so I am excited for them to hatch.
